2005 RIAI _ DOEHLG New Housing Trends Exhibition, Dublin, Ireland

2008 RIAI - Irish Architecture Award Selected for Exhibition

2009 Selected for RIAI – New Housing 2

Description

Passive Design defines our approach to our architectural work. This innovative design produces a new model for housing in the city with higher than expected performance in terms of solar gain, privacy and use. This project was selected as part of the joint RIAI DOE promotion of new forms of community housing exhibition and has been published in the 2009 edition of the RIAI New Housing 2 book.
